

Anthem Update to Members:

GLMS, on your behalf, has aggressively pushed back against Anthem's changes to Modifier 25, changes which were going to significantly reduce physician payments and hurt patient outcomes. Responding when the news broke, GLMS hosted a meeting in December 2017 between Anthem representatives and physicians at our headquarters, published an Op-Ed arguing against the changes in The Courier-Journal, and maintained our dialogue through an aggressive social media campaign which included the release of an informative and passionate DocTalks video. We are proud to say that our efforts were successful. Anthem has agreed to fully rescind their proposed cuts to Modifier 25. This could not have been done without the dedicated work of our physicians. Thank you all for your advocacy.
