

Recommendations for Providers during the Current Hepatitis A Outbreak

On November 28, 2017 the Kentucky Department for Public Health declared an outbreak of acute Hepatitis A (HAV) with cases in multiple counties in Kentucky. The overwhelming majority of the cases have been in Louisville. Cases have shown a genetic match to Hepatitis A outbreaks in California. General information on Hepatitis A for providers can be found at <https://www.cdc.gov/hepatitis/hav/havfaq.htm>

Recommendations for Providers:

1. Consider HAV infection in individuals, especially the homeless, those who use illicit drugs and MSMs (Men who have Sex with Men) with discrete onset of symptoms (e.g., nausea, vomiting, diarrhea, anorexia, fever, malaise, dark urine, light-colored stool, or abdominal pain), and jaundice or elevated liver function tests.

2. Complete the HAV Risk Questionnaire on all suspect cases and report all confirmed cases with 24 hours.

Please complete [the HAV Risk Questionnaire found on page 2](#) on all suspected cases and fax it to the Louisville Metro Department of Public Health and Wellness at 502-574-5865.

Providers should also report all lab confirmed HAV cases within 24 hours to the Louisville Metro Department of Public Health and Wellness by fax at 502-574-5865 or by phone at 502-574-6675. Please use [the EPID200 form found on page 3 & 4](#). This is required reporting and is not a violation of HIPAA.

3. Provide post-exposure prophylaxis (PEP) for close contacts of confirmed HAV cases. Susceptible people exposed to hepatitis A virus (HAV) should receive a dose of single-antigen HAV vaccine or intramuscular (IM) immune globulin (IG) (0.1 mL/kg), or both, as soon as possible within 2 weeks of last exposure. The efficacy of combined HAV/Hepatitis B virus (HBV) vaccine for PEP has not been evaluated, so it is not recommended for PEP. Providers who do not have available vaccine may direct patients to the Louisville Metro Department of Public Health and Wellness at 400 E. Gray St.

4. Provide HAV vaccine to the homeless, illicit drug users and MSMs (Men who have Sex with Men) who are not already immunized. The combined HAV/HBV vaccine may be used in this group if the individual is not already immune to HBV.

5. Provide HAV vaccine to unimmunized school age children. Effective July 1, 2018 all Kentucky students in kindergarten through twelfth grade must show proof of having received two doses of Hepatitis A vaccine to attend school. Providers should begin providing these immunizations to their patients.

If acute viral Hepatitis is suspected as a diagnosis for a patient, please complete the following questions to the best ability possible and fax to 502-574-5865.

Please call the Communicable Disease office at 502-574-6677 if you have any questions. Additionally if lab results are positive for Hepatitis please report this to the fax number above.

Patient Information		
Name:	Patient ID:	
In the last 7 weeks: Number of Male sexual partners: _____ Number of Female sexual partners: _____

Please use the following information and fax numbers (when relevant) for reporting:

HIV/AIDS Cases:

Forms other than the EPID 200 are required for reporting HIV/AIDS cases in children and adults. Obtain those forms by calling [866-510-0008](tel:866-510-0008), or those forms can be downloaded from the DPH Website, <http://chfs.ky.gov/dph/epi/HIVAIDS/surveillance.htm>. Contact information for telephoning case reports and addresses for mailing case reports are on that Website.

Reports for HIV/AIDS cases should not be faxed.

[Pediatric Confidential Case Form](#) (PDF, 451k)
(for patients younger than 13 at time of diagnosis)

[Adult Confidential Form](#) (PDF, 441k)
(for patients 13 or older at time of diagnosis)

Sexually Transmitted Disease Cases:

Confidential reports for STD cases can be submitted on the EPID 200 form.

Fax a completed form for STD Cases, only, to 502-564-5715. Or, mail to:

Kentucky Department for Public Health
STD Prevention and Control Program
275 E Main St, MS: HS2CC
Frankfort, KY 40621

Animal Bite Reports:

Healthcare providers and healthcare facilities should fax reports about animal bites directly to the **Local Health Department (LHD) serving the county in which the patient resides.** Please do not fax reports about animal bites to the Kentucky Department for Public Health.

Reporting All Other Diseases and Conditions Listed in 902 KAR 2:020 (Reportable Disease Surveillance) or in any Public Health Advisory (PHA) Issued per that KAR that Requires Using the EPID 200 Form for Reporting:

Reports, depending upon the notification classification described in 902 KAR 2:020 or in a PHA, shall be submitted by phone, by electronic submission, or by fax or mail submission on an EPID 200 form to the **Local Health Department (LHD) serving the county in which the patient resides.**

If submitted by telephone, an electronic or fax submission shall be made within one business day to the LHD serving the county in which the patient resides.
